DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9 October 2001 has been entered.

2. This action is in response to papers filed 5 September 2001 in Paper No. 11 in which claims 1-12, 14-16 and 22-25 were amended and new claims 26-38 were added. All of the amendments have been thoroughly reviewed and entered.

Claims 1-16 and 22-38 are pending.

Specification

3. The substitute specification filed 9 October 2001 has not been entered because it does not conform to 37 CFR 1.125(b) because: the submitted substitute specification does not include a marked-up copy of the specification as required by section (2).

(b) A substitute specification, excluding the claims, may be filed at any point up to payment of the issue fee if it is accompanied by:

(2) A marked up version of the substitute specification showing all the changes (including the matter being added to and the matter being deleted from) to the specification of record. Numbering the paragraphs of the specification of record is not considered a change that must be shown pursuant to this paragraph.

Art Unit: 1655

Election/Restrictions

4. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, 13-16 and 22-25, drawn to a substrate.

Group II, claim(s) 12 and 26-38, drawn to method for immobilizing and amplifying DNA.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I and II appears to be a solid state substrate having thermal conductivity.

However, Chrissey et al. (U.S. Patent No. 5,688,642) disclose a solid state substrate having thermal conductivity (Column 1, lines 29-32).

Therefore, the technical feature linking the inventions of Groups I and II does not constitute a special technical feature as defined by PCT Rule 13.2 because it does not define a contribution over the prior art.

Accordingly, Groups I and II are not so linked by the same of a corresponding special technical feature as to form a single general inventive concept.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
